

Voluntary
Framework of
Accountability

VFA One-Year Cohort

Beginning with the 2018 collection cycle, the VFA is adding the ability to report AACC Pathways Key Performance Indicators (KPIs), from raw file uploads. In order to provide more timely data for decision making as part of the integration of the Pathways KPIs, we are adding the ability to import an additional cohort –a one-year cohort.

2018 Collection Cycle

Status of Data: Data Entry in Progress

Select Cohort Type:

One Year (2016)

Two Year (2015)

Six Year (2011)

One Year Cohort (2016) Raw File Collection

VFA Institution ID: VFA Community College - 184828

File Collection Status:  Receiving Files

File Collection Last Processed: n/a

Since the Pathways KPIs are based on the first-term and first-year experiences for students, we are adding the opportunity for colleges to upload a one year cohort to view more timely data for institutional use. The data uploaded for the one-year cohort will only be used for calculating the pathways KPIs, and will only be available as part of the Raw File upload process.

The process for uploading the raw files will be similar to the two year and six year cohort process. A college will need to upload five raw files; however, only three of the files will require data in them to successfully calculate these metrics:

- Student Demographic file
- Student Developmental Need file
- Student Course file

Colleges will need to upload empty files with a header row for the other two files (Student Completion and Student Transfers), but no student data needs to be included.

If you have any questions or concerns, please email VFA@aacc.nche.edu.
